

Education about food is crucial for a transition into a *more sustainable* and *healthier* future.

Join educators and schools all around Europe using FoodEducators lesson plans and learning materials!

About us

FoodEducators develops and disseminates learning materials to support teachers and encourage students to become better informed, conscious consumers of the future.

OUR VISION

A world where all young people have access to food education and are aware of exciting and innovative agrifood careers.

OUR MISSION

To support educators to teach, engage and inspire young people about the food they eat and consider a career in agrifood.

Why should your students learn about food, **health**, **sustainability** and **agrifood careers**?

Healthy lifestyle habits developed at a young age are crucial to prevent the development of non-communicable (behavior-related) diseases later in life.

In many European countries, there is a gap in nutritional education, especially relating to critical thinking and current scientific knowledge.

Food literacy from a young age is essential in supporting the urgently needed transformation of the food system towards healthier and more sustainable diets.

The EU agrifood sector faces challenges, including the lack of a skilled workforce with a wide variety of professional profiles.

FoodEducators learning materials are built around 4 themes:

Agrifood Jobs & Careers

Food Science & Food Systems

Food & Sustainability

Food & Health

Our programme focuses on these main learning objectives:

SYSTEMS THINKING

Inspiring healthy and sustainable food choices and agrifood careers

SUSTAINABLE AND HEALTHY LIFESTYLES

Understanding healthy and sustainable eating patterns to become well-informed, conscious consumers - from farm to fork to disposal.

AGRIFOOD CAREERS

Inspiring leadership, food science literacy, entrepreneurial mindsets, and vocational possibilities among young people aged 8 to 18 years old.

FoodEducators' offer to teachers and schools:

Ready-to-use lesson plans adapted to national contexts

Students worksheets, videos and experiments

Resources for teachers and educators

An EU-wide food education community

What teachers say about our materials:

These handbooks are a treasure box with plenty of good ideas and supporting materials!

The handbooks are practical and activities-oriented. They provide a great foundation to build on.
